

The face of a new generation of aspirational adventurers and natural history filmmakers, 29-year-old National Geographic Explorer Bertie Gregory takes viewers on epic and nail-biting journeys that push into the most spectacular and secretive corners of our wild world. Armed with leading-edge film technology, the Disney+ original series **EPIC ADVENTURES WITH BERTIE GREGORY**, from National Geographic, breaks the mold of the traditional natural history program by telling extraordinary, real-life animal stories and taking viewers with him for every beat of the action. For weeks at a time, the charismatic BAFTA Award-winning cinematographer immerses himself into the animals' lives to capture the untold stories of iconic creatures living in some of the harshest environments on our planet. This season, we will see Bertie braving the icy worlds of Antarctica in search of the biggest gathering of whales ever filmed and coming face-to-face with specialist buffalo-hunting lions in Zambia. In this multipart adventure series, he will take audiences on an ambitious odyssey across the globe, showcasing the natural world at a time when it faces its greatest challenges.
