

# OWN THE ROOM

## "OWN THE ROOM" FILM SUBJECT BIOS

### **Jason Hadzikostas (Greece)**

Jason is originally from Greece. He co-founded iCry2Talk in order to bridge the communication gap between parents and infants. iCry2Talk translates in real-time a baby's cry using artificial intelligence and maps it to a specific category such as hunger, sleep and more. iCry2Talk lays the groundwork for a holistic baby monitoring system, ranging from improved software acoustic analysis to new hardware solutions. The company has recently continued to expand the cry collection and has completed the development of algorithms to maximize the precision of the iCry2Talk systems. It is also currently collaborating with a large baby care corporation to conduct 'internal testing' of the algorithms' efficiency and accuracy with new parents as volunteers. Since filming, Jason has graduated from Aristotle University of Thessaloniki with an integrated master's in electrical and computer engineering, completed his mandatory military service and moved to Athens to be closer to iCry2Talk's Greek branch.
