

Please note that the antenna will be rigged to rotate.

Please note that the shoulder pad will be painted with the same color blue that is seen on the generic 501st clones

Old Rex Helmet

New EP3 Helmet

New Rex Helmet

The side vents on the helmet are texture, not geo.

The circular geometry on the side indents is from the existing Clone Commander Wolffe Ep3 asset.

- Rex's New Helmet is a mix of his old Helmet and the new EP3 style Clone Helmet.
- Re'use His old T Visor as a base.
- The Round pieces on his chin are similar to those of the EP3 Helmet, but 'lowered' and modified to fit shape of Rex's old T Visor. Keep New and Old versions of T visor as similar as possible while adjusting to new EP3 forms.
- Note that 'mouth' portion will have 'teeth' like the new EP3 Helmets.
