

EXPLORER

# THE LAST TEPUI

The Disney+ Earth Day special "**Explorer: The Last Tepui**," from National Geographic, follows elite climber **Alex Honnold** ("Free Solo") and a world-class climbing team led by National Geographic Explorer and climber **Mark Synnott** on a grueling mission deep in the Amazon jungle as they attempt a first-ascent climb up a 1000 foot sheer cliff. Their goal is to deliver legendary biologist and National Geographic Explorer **Bruce Means** to the top of a massive "island in the sky" known as a tepui. The team must first trek miles of treacherous jungle terrain to help Dr. Means complete his life's work, searching the cliff wall for undiscovered animal species. The one-hour special is the newest installment of National Geographic's long-running "Explorer" series. This Earth Day, learn why the tepuis – much like the Galapagos – are a treasure trove of biodiversity worth protecting.

The one-hour special streams on Earth Day, Friday, April 22<sup>nd</sup>.
